

RAY DENKEWICZ
Managing Director -
Hayward IMG

As the new year is upon us, I want to take a moment to sincerely thank you for your partnership, trust, and collaboration throughout the past year during which we celebrated the 100 year anniversary of Hayward as a company.

Across our markets in Asia, the Middle East, and Latin America, your commitment, professionalism, and shared dedication to quality have been essential to our mutual success.

We are truly grateful for the relationships we have built together and for the confidence you place in our products and our team.

The pool industry is driven not only by innovation and performance, but by strong partnerships—and we value ours deeply.

Our flagship products are engineered to help every pool perform at its absolute best. From industry-leading energy efficiency that reduces power consumption and extends equipment life, to intuitive

chemistry control and sanitization systems - including salt and UV solutions - Hayward delivers optimal water quality, safety, and peace of mind.

At the heart of Hayward products is a team of passionate professionals dedicated to delivering exceptional environments. Every product we offer is backed by our mission: to deliver superior performance, outstanding service, and cutting-edge technology that transforms the experience of water.

As we look ahead to the coming year, we are excited to continue working alongside you to grow, improve, and achieve even greater success together with products proudly made in the USA, and now also available from our state of the art facilities in Europe and Wuxi.

I hope you had a wonderful holiday and on behalf of everyone at our company, **I wish you, your teams, and your families a healthy, prosperous New Year!**

X-Pro 600 Skimmer
SHIFT YOUR POOL TO THE NEXT LEVEL

Then new **Hayward® X-Pro 600 Skimmer** creates an infinity effect with perfect integration into the pool deck with 55 mm between the water level and pavement.

Anti-Entrapment Design – 9cm

It's easy to install and maintain with options for a variety of pool types. The

mouth of the skimmer has an anti-entrapment design and meets European and Australian standards. A latch-on lid avoids accidental opening and the heavy-duty design of the infinity mouth achieves the category of self-supporting structure with no rebar needed.

Fillable Lid

The skimmer is fully integrated into the layout/backyard with fillable lid, four colour range and minimalist design.

Dedicated space for level and temperature sensors that can be controlled through AQUARITE® S3 system.

Space for automation probes

HAYWARD® ENERGY STAR® CERTIFIED
LINEUP OF VARIABLE-SPEED PUMPS

Hayward has the broadest range of ENERGY STAR certified pool pumps, including

a full line of energy-efficient, sustainable and digitally connected variable speed pumps.

TriStar® XL

Hayward Variable Speed Pumps feature

permanent magnet, totally enclosed fan cooled (TEFC) motors that deliver **maximum energy efficiency** and reliability. They are exceptionally quiet compared to single speed pumps when running at maximum speeds.

TriStar® VS

The pumps are fully programmable with a touch pad control that can be rotated to four different

positions or mounted to the wall for more convenient access.

Super Pump® VS 700

The pumps can operate independently, with Hayward **Omni** automation, or with competitive systems (via relay control).

MaxFlo® VS 500

Hayward is proud to be recognized by the US EPA for our energy management best practices, leadership, innovation and commitment to environmental protection.

HeatPro® 5T Series Heat Pump
INDUSTRY-FIRST MICROCHANNEL TECHNOLOGY

The new Hayward **HeatPro® 5T MCHX Series** of electric heat pumps utilize industry-first microchannel technology.

The **5T MCHX Series** warms the water to extend the swim season, and the cooling option cools the water to a refreshing temperature during periods of warm weather and even chills down to 40°F, making it perfect for therapeutic cold plunges.

The robust coil structure of the **5T MCHX** protects against fin damage from impacts during installation and transportation and there is less degradation versus the tube and fin construction.

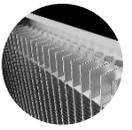

Robust Coil Structure

An 85% reduction in braze joints of the **5T MCHX Series** means less leak opportunities and the TCP coating provide durability in the harshest climates.

85% fewer braze joints

Overall weight reduction and use of less R-410A refrigerant in the 5T MCHX Series make the heater **more eco-friendly**.

Best In Class Coating

The **HeatPro® 5T MCHX Series** is AHRI Certified and proudly built in the USA.

Universal CrystaLogic® White Lights
THE NEXT EVOLUTION OF BRILLIANT LED LIGHTING

Universal CrystaLogic® 2.0(UCL) White LED Pool and Spa Lights deliver bright, longer-lasting LED lighting for all pools and spas. With the brightest-in-the-industry white LED lighting, Hayward saves you up to 86% on energy costs—without sacrificing an ounce of brilliance.

They represent break through technology for the illumination for any feature or body of water. First to be UL Listed to retrofit virtually all existing manufacturers' niches, **Universal CrystaLogic®** lighting is designed to drastically **reduce operation costs** and deliver unparalleled performance.

Targeted light distribution prevents glare from above while also enhancing the distance of the light, creating a uniformly illuminated environment.

Industry-first adjustable lower catch simplifies installation with the ability to overcome variations in plaster thickness.

Design flexibility with detachable cord and stainless steel trim provide lighting options that ensure easy installation and service.
