

UltraUV2™

ULTRAVIOLET WATER SANITIZER

-Safe and Eco-Friendly

The **UltraUV2™** is easy to install in new and existing pools with multi-directional piping connections. Water circulates through the chamber and the UV-C lamp immediately inactivates 99.9% of micro-organisms such as crypto, giardia and algae which are resistant to chlorine.

Germicide
254 nm

This provides a cleaner, clearer swimming environment with zero harmful by-products.

The total amount of chlorine needed to maintain an adequate level of residual sanitizer reduces dramatically (a minimum residual level of chlorine should be maintained at all times).

100% corrosion resistant housing with 360° direct view lamp indicating ring lets you know the unit is on.

ColorSplash®

Multi-Color Plus White In-Ground LED Pool and Spa Lighting Fixtures

J&J Color Splash® Series of in-ground pool and spa fixtures and lamps offer a variety of lighting colors and shows.

With five solid colors and seven lights shows, instantly transform any pool or spa into a custom illuminated paradise.

Color Splash® Series fixtures and lamps operate with a standard pool light switch. RGB and RGB-W models operate with most manufacturers' automation systems.

Zero Pixelation Lens provides fuller, richer color. An advanced processor delivers seamless color transitions while a Heavy Duty 316 Stainless Steel fixture construction allows for industry leading warranty.

J&J Color Splash® lights are designed, engineered and assembled in the USA.

H-Power

- Packaged Electrical Panels

H-Power electrical systems are available in single phase and three phase options and have integrated overload protection. All electronics (breaker, contactors, timer) are included in a single module.

H-Power Connect

The panels are available with light transformers in 50W, 100W and 300W options along with 2 timers for filtration and a timer for lighting.

The **H-Power Basic** system is a simple modular panel for a single filtration pump.

H-Power Basic

The **H-Power Connect** can control pumps and lights through Bluetooth with a smartphone using the HPOWER app.

H-Power electrical systems can help you reduce installation costs.

The **H-Power** systems are available in 50Hz only and ship from France.

SUCTION ENTRAPMENT

The Hidden Danger

Mechanical Entrapment:

There is potential for jewelry, swimsuit, hair decorations, fingers, toes or knuckles to be caught in an opening of a suction outlet or suction outlet cover resulting in mechanical entrapment.

Hair Entrapment:

Hair can become entangled in suction outlets

Limb Entrapment:

A limb inserted into an opening of a suction outlet or suction outlet cover that is damaged, broken, cracked, missing or not securely attached can result in a mechanical bind or swelling of the limb.

Body Suction Entrapment:

A differential pressure applied to a large portion of the body or limbs can result in entrapment

Evisceration/ Disembowelment:

A negative pressure applied directly to the intestines through an unprotected suction outlet sump or suction outlet cover which is damaged, broken, cracked, missing, or unsecured can result in evisceration/disembowelment.

The risk of suction entrapment can be

reduced by using **VGB Compliant suction outlets** (main drains)

Hayward WG Series VGB Compliant Outlets and Covers

9", 12" and 18" Square Drain Covers and Frames

All **Hayward WG Series** suction outlet fitting assemblies and replacement covers have been tested to ANSI/APSP/ICC-16 2017, are VGB compliant and meet CPSP requirements. Hayward square drain covers are available in a wide range of sizes and flow designs. Hayward's High Flow covers have some of the industry's highest approved flow rates.

For concrete, vinyl and fiberglass pools, Hayward round suction outlets are available in a range of plumbing configurations, plaster collar options and colors.

WG1030AVGBLPAK2 Dual Suction Flow Drain Cover and Frame, Black

Safety Vacuum Release System

The **Vac-Alert™** System reduces the risk of suction entrapment in pools by providing a critical layer of protection against body or limb drain suction entrapment.

It reacts in less than a second to quickly release suction vacuum by allowing enough air into the piping system to ensure dissipation of the dynamic suction force caused by the circulating pump.

The Vac-Alert system is easy to install, adjust and test and is completely compliant with the Virginia Graeme Baker Pool & Spa Safety Act. For more information: **Vac-Alert.com**

Vac-Alert is an independent company.
