IMPORTANT SAFETY INSTRUCTIONS

Basic safety precautions should always be followed, including the following. Failure to follow instructions can cause death and/or severe injury.

READ AND FOLLOW ALL INSTRUCTIONS

▲ WARNING - Risk of Electric Shock. NEVER attempt any work without shutting off the electricity.

- Read all instructions before installing.
- System is intended for installation by a qualified electrician in accordance with the National Electrical Code and local regulations.
- Place the wall switch in the "OFF" position.
- Go to the main fuse box or circuit breaker. Unscrew the fuse(s) or switch "OFF" the circuit breaker switch(es) that control the power to the space that you are working on.

▲ WARNING - Risk of Electric Shock. Install all fixtures no less than 10 ft (3.05 m) from pools, spas, or fountains.

▲ WARNING - Risk of Electric Shock. This fixture must be installed in accordance with the National Electric Code and local code specifications. Failure to follow these codes and installation instructions will void the warranty and may result in serious injury and/or damage to the fixture. When using multiple fixtures, do not exceed the total wattage load as specified by the transformer rating. This product is designed for above ground installation only. Always use UL listed wire and wire connectors for connections. Do not operate the fixture if the hood is missing or damaged.

▲ CAUTION - All parts must be used as indicated in these instructions. Do not substitute any parts, leave parts out, or use any parts that are worn out or broken. Failure to follow this instruction could invalidate the cETLus listing of this fixture.

NOTICE - The components of this light fixture cannot be replaced. Handle all parts with care. Any damage to the light, including electrical and wiring components, necessitates replacing the entire light.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This Class B device complies with CAN ICES-5(B) / NMB-5(B), Ce appareil de la classe B est conforme à la NMB-005 du.

HAYWARD®

Supplier's Declaration of Conformity
47 CFR § 2.1077 Compliance Information

Product Information

Product Type: Landscape Light
Model Name: ColorLogic Landscape
Model Number: LLBUS22BL3, LLPUS22BL3, LLBUS22AB3,
LLPUS22AB3, LLPUS22BZ3, LLBUS22BZ3

Applicable Standards: FCC Part 15, Subpart B:2019

This device complies with related rules, operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

The test result has been evaluated by Best Verification LLC. as shown in the test report.

Test Report Number: BTR66.01.0302, BTR66.01.0303

It is understood that each unit marketed is identical to the device as tested, and any changes to the device that could adversely affect the emission characteristics will require retest.

The following responsible party designated in FCC §2.909 is responsible for this declaration:

Company Name: Hayward Pool Products
Company Address: One Hayward Industrial Drive Clemmons, NC 27012
Company Website: <https://www.hayward.com/>

What's Included

Mounting Stake

Light Fixture

Fixture Cap

Outdoor Rated Wire Nut (x2)

Installation

Before You Begin

IMPORTANT - The stem of the light fixture has an exposed LED panel that is susceptible to damage. Inspect the light before installing and exercise caution when threading the fixture cap. Any damage to the LED is NOT eligible for warranty coverage.

Installation and Mounting Overview

HAYWARD®

Mounting the Stake

⚠ WARNING - Turn the main power OFF before proceeding.

Mount the stake by placing a piece of wood on the stake and hammering the wood. Hammer until the bottom of the wire slot is flush with the ground.

In the case of hard soil: dig a hole and place the stake so the bottom of the wire slot is flush with the ground. Fill the rest of the hole with the removed soil and pack tight to secure the stake.

Wiring

PLEASE READ BEFORE PROCEEDING

Refer to your transformer power rating to determine how many lights it can support.

- Input rating: 12 VAC, 3.6 W.
- Maximum supply wire length: 500 ft.

IMPORTANT - When installing multiple lights, position high-power groups closer to the transformer.

IMPORTANT - For longer wire lengths with multiple fixtures, use shorter sections and place the transformer at the midpoint of the total supply wire length. For example, use two 250 ft sections for 500 ft length.

NOTE TO INSTALLERS - Measure for voltage drop during installation and use the appropriate tap on the transformer for optimal performance.

1. Cut the transformer power supply wire at the location of the fixture.
2. Separate the power supply wire a couple inches apart by lightly pulling on each side, creating two individual wires.
3. Strip off ½" of insulating material from each wire and connect each wire to the fixture using the provided outdoor rated direct burial wire nuts.

To install multiple fixtures, connect the power supply wire of each additional fixture to the initial connection, as described in Step 3.

Attaching the Fixture Cap

⚠ CAUTION - The stem of this light fixture has an exposed LED panel. To prevent damage, carefully attach the fixture hood **BEFORE** installing into the mounting stake.

Thread the fixture cap into the stem body by rotating it clockwise until snug.

Installing the Fixture

⚠ CAUTION - Be sure to maintain slack on the wires inside the fixture. Excess tension on the wiring could pull on the LED panel and damage the light.

1. Screw the fixture onto the stake provided, leading the wire from the fixture through the wire slot in the stake.
2. If desired, bury the wire by digging a small trench.
3. Repeat for other fixtures in the same electrical circuit.
4. Turn the main power supply back on and ensure the fixtures illuminate.

Operation

ColorLogic Landscape Path LED light fixtures are designed to operate in one of five modes: Universal ColorLogic, Pentair SAM®, Jandy, ColorSplash, and OmniDirect mode.

Hayward Universal ColorLogic Mode

Use this mode for installations with other Hayward Universal ColorLogic lights.

Pentair SAM Mode

Use this mode when installing your new light in systems with Pentair SAM or SAL® lights. The Pentair SAM/SAL light will recognize the ColorLogic light(s) and they will all operate in the same manner.

Jandy Mode

Use this mode when installing your new light in systems with Jandy lights. The Jandy light will recognize the ColorLogic light(s) and they will all operate in the same manner.

ColorSplash Mode

Use this mode for installations with ColorSplash lights.

Hayward OmniDirect Mode

OmniDirect mode offers unique colors as well as speed and brightness control. It must be configured and controlled by a Hayward OmniLogic, OmniHub or other Omni type pool controller. Refer to the controller's manual for more information.

To change modes

1. Turn on lights and then turn off for 11-15 seconds. Repeat this sequence two more times. The light should blink one of five colors to indicate which mode is activated. Refer to the table below to determine which mode is currently active. Note that new lights default to Universal ColorLogic mode.

Mode	Color
Universal ColorLogic	Red
Pentair SAM	White
Jandy	Blue
ColorSplash	Green
OmniDirect	Magenta
2. To change modes again, turn light off and back on. The light will then advance to the next mode. Repeat this sequence until you arrive at the desired mode.
3. When the light is set to the desired mode, remove power from the lights for at least one minute. The light will restart in the new mode the next time you turn it on.

NOTE: Performing an additional reset will sync any connected lights to Universal ColorLogic mode.

Universal ColorLogic Mode

ColorLogic Landscape Path lights default to Universal ColorLogic mode when powered for the first time. Light colors and shows are controlled through power-cycling: a method of changing light programs by turning the light off and on, removing the need for a special controller or interface. The number assigned to each light program represents the number of power-cycles necessary to activate it.

- To activate the light: Turn on the switch.
- To deactivate the light: Turn off the switch.
- To advance to the next light program (fixed color or color show): Turn off the switch and turn back on within 10 seconds. Repeat until you reach the desired light program.

When the light has been off for over 60 seconds, and is first turned on, it will illuminate white for 15 seconds, then proceed to the last running fixed color or color show.

NOTE: Do not power cycle the light during the first 15 seconds of white to prevent losing synchronization with other connected lights.

Light Synchronization

ColorLogic lights can synchronize with multiple Hayward Universal ColorLogic lights to display the same colors and shows at the same time. For light synchronization, all lights must be wired to the same switch. Once installed, all lights should automatically synchronize. To re-synchronize your lights, turn the switch on, then back off. Wait between 11 and 14 seconds and turn the switch back on. When the lights come back on, they should enter Program #1 (Voodoo Lounge) and be synchronized.

Programs

ColorLogic Light Shows and Solid Colors		
1. Show-Voodoo Lounge	7. Fixed-Cloud White	13. Show-Tranquility
2. Fixed-Deep Blue Sea	8. Fixed-Warm Red	14. Show-Gemstone
3. Fixed-Royal Blue	9. Fixed-Flamingo	15. Show-USA
4. Fixed-Afternoon Skies	10. Fixed-Vivid Violet	16. Show-Mardi Gras
5. Fixed-Aqua Green	11. Fixed-Sangria	17. Show-Cool Cabaret
6. Fixed-Emerald	12. Show-Twilight	

Pentair SAM Mode

Light colors and shows are controlled through power-cycling: a method of changing light programs by turning the light off and on, removing the need for a special controller or interface. The number assigned to each light program represents the number of power-cycles necessary to activate it.

- To activate the light: Turn on the switch.
- To deactivate the light: Turn off the switch.
- To select a light program (fixed color or color show): Turn the switch off and back on the number of times that corresponds to your desired show or color. Use the table below to determine how many power cycles are required for each light program.

NOTE: The number of power cycles is always the same for each program, even if another program is currently active. Always select a program using its corresponding number of cycles.

Light Synchronization

ColorLogic lights can synchronize with multiple Pentair SAM lights so that they all display the same colors and shows at the same time. For light synchronization, all lights must be wired to the same switch. Once installed, all lights should automatically synchronize.

Programs

Pentair Program Name	Light Shows and Solid Colors
1. SAM Show	Cycles through white, magenta, blue and green colors
2. Party Show	Rapid color changing building energy and excitement
3. Romance Show	Slow color transitions creating a mesmerizing and calming effect
4. Caribbean Show	Transitions between a variety of blues and greens
5. American Show	Patriotic red, white and blue transition
6. California Sunset Show	Dramatic transitions of orange, red and magenta tones
7. Royal Show	Richer, deeper color tones
8. Blue	Fixed color
9. Green	Fixed color
10. Red	Fixed color
11. White	Fixed color
12. Magenta	Fixed color
13. Color Lock	Save current color effect during a color light show
14. Return	Activate last saved color effect

Color Lock Feature (Program 13)

You can select a non-standard solid color at any time by activating the color lock feature. The color lock feature allows you to stop a light show and “lock” on any color during an active light show. To “lock” a solid color, power cycle the pool light switch off/on thirteen times when the desired color is displayed during the active light show.

HAYWARD®

Return Feature (Program 14)

You can return to the last color locked color effect while in a light show mode or fixed solid colors by activating the return feature. To return to the last color locked color effect, power cycle fourteen times. After five seconds, the last saved color lock effect will be displayed.

When connected to a Pentair Controller: Select fixed colors and color shows using the controller. Refer to your control's manual to determine compatibility and for specific information about configuration and operation.

Jandy Mode

Light colors and shows are controlled through power-cycling: a method of changing light programs by turning the light off and on, removing the need for a special controller or interface. The number assigned to each light program represents the number of power-cycles necessary to activate it.

- To activate the light: Turn on the switch.
- To deactivate the light: Turn off the switch.
- To advance to the next light program (fixed color or color show): Turn off the switch and turn back on within 3 seconds. Repeat until you reach the desired light program.

If the light is off for 7 seconds or more, it will return to the most recently used color program when turned back on. This function allows you to keep your favorite color mode activated upon every start up.

Light Synchronization

ColorLogic lights can synchronize with multiple Jandy lights so that they all display the same colors and shows at the same time. For light synchronization, all lights must be wired to the same switch. Once installed, all lights should automatically synchronize. To re-synchronize your lights, turn the switch on, then back off, wait for 5 seconds and turn the switch back on. When the lights come back on, they should enter Program #1 (Alpine White) and be synchronized.

Programs

Jandy Light Shows and Solid Colors	
1. Fixed-Alpine White	8. Fixed-Magenta
2. Fixed-Sky Blue	9. Fixed-Violet
3. Fixed-Cobalt Blue	10. Show-Slow Color Splash
4. Fixed-Caribbean Blue	11. Show-Fast Color Splash
5. Fixed-Spring Green	12. Show-America the Beautiful
6. Fixed-Emerald Green	13. Show-Fat Tuesday
7. Fixed-Emerald Rose	14. Show-Disco Tech

When connected to a Jandy Controller: Select fixed colors and color shows using the controller. Refer to your control's manual to determine compatibility and for specific information about configuration and operation.

ColorSplash Mode

Light colors and shows are controlled through power-cycling; a method of changing light programs by turning the light off and on, removing the need for a special controller or interface. The number assigned to each light program represents the number of power-cycles necessary to activate it.

- To activate the light: Turn on the switch.
- To deactivate the light: Turn off the switch.
- To select a light program (fixed color or color show): Turn the switch off and back on the number of times that corresponds to your desired show or color. Use the table below to determine how many power cycles are required for each light program.

NOTE: The number of power cycles is always the same for each program, even if another program is currently active. Always select a program using its corresponding number of cycles.

Light Synchronization

If your pool or spa has multiple ColorSplash lights, you can configure them to operate independently or synchronize to display the same colors and shows at the same time. For light synchronization, all lights must be wired to the same switch. Once installed, all lights should automatically synchronize.

Programs

ColorSplash Program Name	Light Shows and Solid Colors
1. Peruvian Paradise	Cycles through white, magenta, blue and green colors
2. Super Nova	Rapid color changing building energy and excitement
3. Northern Lights	Slow color transitions creating a mesmerizing and calming effect
4. Tidal Wave	Transitions between a variety of blues and greens
5. Patriot Dream	Patriotic red, white and blue transition
6. Desert Skies	Dramatic transitions of orange, red and magenta tones
7. Nova	Richer, deeper color tones
8. Parisian Blue	Fixed color
9. New Zealand Green	Fixed color
10. Brazilian Red	Fixed color
11. Arctic White	Fixed color
12. Miami Pink	Fixed color
13. Color Lock	Save current color effect during a color light show
14. Return	Activate last saved color effect

Color Lock Feature (Program 13)

You can select a non-standard solid color at anytime by activating the color lock feature. The color lock feature allows you to stop a ColorSplash light show and “lock” on any color during an active light show. To “lock” a solid color, power cycle the pool light switch off/on thirteen times when the desired color is displayed during the active light show.

HAYWARD®

Return Feature (Program 14)

You can return to the last color locked color effect while in a light show mode or fixed solid colors by activating the return feature. To return to the last color locked color effect, power cycle fourteen times. After five seconds the last saved color lock effect will be displayed.

Memory Mode

When your light fixtures are turned off for longer than 10 seconds, the light show or solid color on display will be stored. The next time the power is turned on, the fixture will display that saved memory light show or color.

OmniDirect Mode

OmniDirect mode offers unique colors as well as speed and brightness control. To use OmniDirect mode, the ColorLogic lights must be configured and controlled by a supporting Hayward “Omni” pool control. Compatible pool controls include the Hayward OmniLogic, OmniHub and OmniPL. Refer to your control’s manual to determine compatibility and for specific information about configuration and operation.

Programs

OmniDirect Light Shows and Solid Colors		
1. Show-Voodoo Lounge	10. Fixed-Vivid Violet	19. Fixed-Orange
2. Fixed-Deep Blue Sea	11. Fixed-Sangria	20. Fixed-Gold
3. Fixed-Royal Blue	12. Show-Twilight	21. Fixed-Mint
4. Fixed-Afternoon Skies	13. Show-Tranquility	22. Fixed-Teal
5. Fixed-Aqua Green	14. Show-Gemstone	23. Fixed-Burnt Orange
6. Fixed-Emerald	15. Show-USA	24. Fixed-Pure White
7. Fixed-Cloud White	16. Show-Mardi Gras	25. Fixed-Crisp White
8. Fixed-Warm Red	17. Show-Cool Cabaret	26. Fixed-Warm White
9. Fixed-Flamingo	18. Fixed-Yellow	27. Fixed-Bright Yellow

HAYWARD® Pool Products Limited Warranty

Hayward Pool Products, Inc., warrants the components of this product to be free from defects in materials and workmanship during the warranty period. Please visit <https://hayward.com/support/resources/warranty> for product warranty details.

The limited warranty excludes damage from freezing, negligence, improper installation, improper use or care, Acts of God or as specified in installation and operations manual. Parts that fail or become defective during the warranty period shall be repaired or replaced, at our option.

Proof of purchase is required for warranty service. In the event proof of purchase is not available, the manufacturing date of the product will be the sole determination of the purchase date.

To obtain warranty service, please contact the place of purchase or the nearest Hayward Authorized Service Center. For assistance on your nearest Hayward Authorized Service Center, please visit us at <https://hayward.com/dealerlocator>.

Hayward shall not be responsible for cartage, removal, repair or installation labor or any other such costs incurred in obtaining warranty replacements or repair.

The Hayward Pool products warranty does not apply to components manufactured by others. For such products, the warranty established by the respective manufacturer will apply.

The express limited warranty above constitutes the entire warranty of Hayward Pool Products with respect to its pool products and is in lieu of all other warranties expressed or implied, including warranties of merchantability or fitness for a particular purpose. In no event shall Hayward Pool products be responsible for any consequential, special or incidental damages of any nature.

Some states do not allow a limitation on how long an implied warranty lasts, or the exclusion of incidental or consequential damages, so the above limitation may not apply to you. This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.
