

HEATPRO[®]
MCHX SERIES

SPEED TO HEAT. SPEED TO CHILL. ELECTRIC HEAT PUMPS.

Hayward's industry-first microchannel technology is designed to efficiently heat, cool, or chill your pool water to the ideal temperature. Use our innovative calculator tool to find out how long it will take to heat or cool your pool or spa to your desired temperature. Whether you're heating a spa or preparing for a cold plunge, we'll recommend the perfect product to suit your needs.

WARMS YOUR WATER

Extend swim season with improved heating capacity below 50°F using our patent pending defrost algorithm.

COOLS YOUR WATER

Ideal for warm or desert climates with 30% increased cooling capacity compared to competitive technology.

CHILLS YOUR WATER

Chills down to 40°F so you can get all the benefits out of your next cold plunge.*

** Only available on Heat + Chill models*

UNIVERSAL HC-SERIES

UNIVERSAL H-SERIES

SPEED TO HEAT. GAS HEATERS.

Hayward's energy-efficient Universal H and HC Series gas heaters generate heat by using either propane or natural gas and are ideal for heating your pool or spa water quickly with the touch of a button. We know that your time matters, so sit back and relax while we quickly and efficiently meet your needs all year long.

WARMS YOUR WATER

Gas heaters are the quickest way to get your pool or spa water to the perfect degree of comfort.

NATURAL OR PROPANE

Maintain water temperature with propane or natural gas regardless of the weather to extend swim season.

THE ULTIMATE COMBINATION

Add a Hayward electric heat pump for the perfect set-up for efficiency, energy savings, speed to heat or chill and extended swim season!
