EQUIPMENT DEBRIS CANISTER

ENHANCE DEBRIS COLLECTION

Owning a pool is all about enjoying clean, refreshing water. The high-capacity Equipment Debris Canister (EDC) is built to capture more debris, reduce maintenance, and enhances the overall appearance of your pool—so you can spend more time enjoying it and less time cleaning. The EDC is even more effective with Paramount's in-floor cleaning and circulation system. Debris is swept into a Paramount® debris drain by powerful jets of water where it is transported to the high capacity EDC for easy removal. Giving you a clean, healthy pool with minimal maintenance.

- Holds up to 68% more debris than any other equipment side canister.
- Filter out even more dirt and debris with the 600 micron fine mesh bag.
- Mounted at the equipment pad for easy install and maintenance.
- Extra-large capacity debris basket means fewer trips to empty canister.
- Maximum water flow with minimal restriction.
- Constructed of weather and UV resistant thermo plastics for long term durability.
- Convenient clear, pressure safe lid.

INCLUDES:

- EDC Canister
- Clear bayonet lid
- Plastic debris basket
- Fine mesh bag

OPTIONAL ENHANCEMENTS

In-floor Cleaning Systems

Automatic in-floor cleaning systems direct powerful jets of water to sweep debris toward the RDX® or MDX-R3® drain, keeping your pool effortlessly clean.

Venturi Skimmer

The Eco-friendly ParaskimV Venturi Skimmer features enhanced surface skimming - even at low pump speeds. You can direct 100% suction to the RDX or MDX-R3, maximizing its ability to remove heavier settled debris.

RDX Drain

Paramount sets the standard in drain technology with the RDX Unblockable Disappearing Drain. The RDX integrates high-flow performance with built-in safety in a single outlet, enabling fast and efficient debris removal.
