

SAVES BETTER.

INDUSTRY LEADER IN ENERGY EFFICIENCY.

TRISTAR® XE
ULTRA-HIGH EFFICIENCY PUMP

WHY SWITCH TO A HAYWARD XE SERIES PUMP?

- » **Better efficiency rating** compared to most competitive variable-speed pumps
- » **Priced up to 1/3 less than** traditional variable-speed pumps
- » **Easy drop-in replacement** with included riser base and simple 1-button programming

ULTRA-HIGH EFFICIENCY, ULTRA-LOW COST OF OWNERSHIP

Hayward's XE Series Pumps are the ultimate solution for upgrading from single-speed pumps to DOE-compliant pumps. Union connections and a riser base allow for simple drop-in replacement of competitive pumps. Not only do XE Series Pumps exceed DOE standards for WEF ratings, they're also priced up to 1/3 less than traditional variable-speed pumps and its WEF ratings even surpass most Pentair and Jandy variable-speed pumps meaning a lower upfront cost plus lower operating cost compared to the competition.

KEY FEATURES

- » **Industry-leading efficiency** exceeds DOE benchmarks and efficiency of many competitive VS pumps
- » **Easily programmable** with up to 6 selectable speeds
- » **Dual-voltage capability** (230V/115V) offers more versatility for installation
- » **Chemical-resistant Viton® seal** offers improved resistance against chemical imbalances
- » **Simple installation** includes standard 2" x 2.5" CPVC unions and doesn't require any additional equipment

Simple button programming
easily switches between speeds
